

 **Inteco**
COMFORT WITHOUT COMPROMISE

CLIMATE CEILING
INSPIRATION BOOK

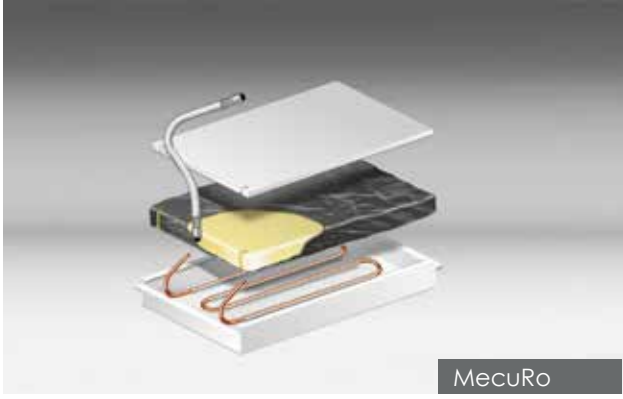

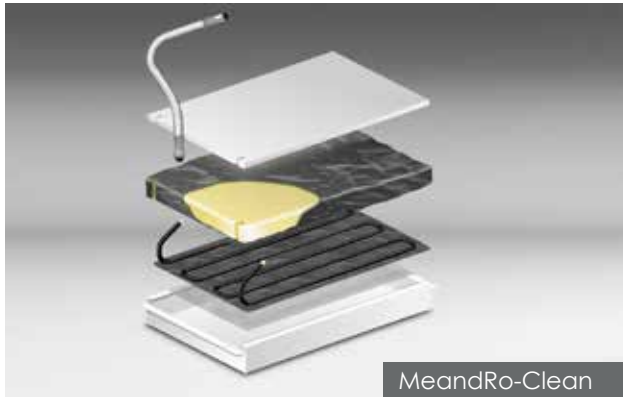

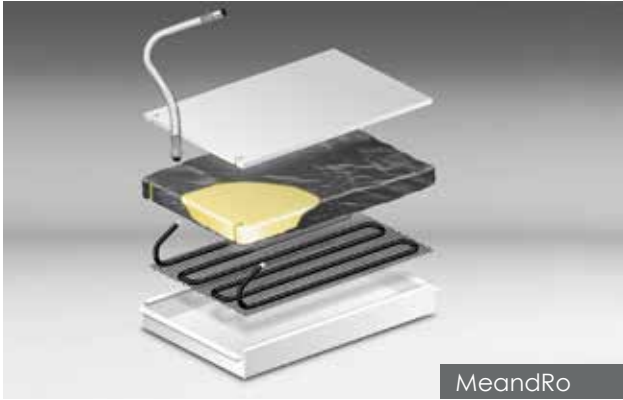

Inteco supplies climate solutions with a distinctive character

We do this by making use of climate ceilings, induction units and hybrid ceilings. The Inteco climate experience fits in with people's comfort requirements, the aesthetic eye of a designer and the technical requirements of a building. Every project is custom-built as we have our own R&D, engineering, production and assembly departments. It is not without reason that our motto is: 'Comfort without compromise'. Our head office is in Boxtel, but we are also internationally active in Luxembourg, Belgium, Denmark and other countries. Our progressive service, quality guarantee and our constant customer focus make Inteco a reliable partner. That is our distinctive character.
