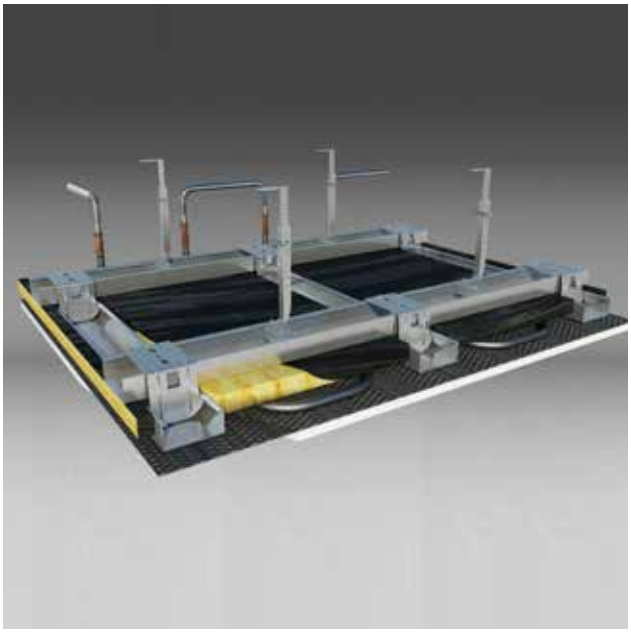
## Copper diffusion-proof climate system for stucco ceilings



### SYSTEM CHARACTERISTICS

- Diffusion-proof system
- Suitable for change-over systems
- Ideal for a fully separated system for cooling and heating (Combi-elements)
- Low integration height (reduction in building height for new-builds/suitable for renovation)
- Complete integration of in-built components (flexible / aesthetic finish)
- Flexible design

### COMFORT BENEFITS

- Cooling and heating (one system for cooling and heating)
- Very high capacities
- Equal temperature distribution (comfortable)
- High reaction speed (for changing water temperatures and volumes)
- Noiseless and without airflow

### ADVANTAGES DURING MANAGEMENT

- Energy-efficient (low energy costs / low CO2 burden)
- Maintenance free (low exploitation costs)
- Fire proof
- CE markings
- Long life-span (> 20 years)
