MeandRo-Clean

Optimal comfort, hygiene and reduction of bacterial spread

SYSTEM CHARACTERISTICS

- Equipped with a sealing plastic foil that separates the space from the plenum
- Approved application by hygiene committee of various hospitals
- Diffusion-proof system
- Suitable for change-over systems
- Ideal for a fully separated system for cooling and heating (combi-elements)
- Individual integration systems (replacement of ceiling panels, future installation/removal)
- Ideal for renovation and activation of existing metal ceilings
- Low integration height (reduction in building height for new-builds/suitable for renovation)
- Complete integration of in-built components
- Flexible design

COMFORT BENEFITS

- Cooling and heating (one system for cooling and heating)
- Very high capacities
- Equal temperature distribution (comfortable)
- Excellent noise absorption
- Noise insulation (optional)
- High reaction speed (for changing water temperatures and volumes)

ADVANTAGES DURING MANAGEMENT

- Disinfectant can adequately disinfect the entire room, including the climate ceiling, by using closing plastic foil
- Energy-efficient / maintenance free
- Complete access to the plenum (for maintenance)
- Safe against fire
- CE markings
- Long life-span (> 20 years)
- Solid system; sustainable in use and ideal for PPP contracts
